

Office of the Director of Public Works

To: Mayor Welch, Common Council Members
From: Howie Robinson, Public Works Director
Date: October 10, 2016
Subject: Discussion and possible action on valve replacement

Summary

We have received cost estimates from Fanning's and Nehl's for the repair and replacement of a water main valve at the intersection of W. Madison Ave. and N. Clear Lake Ave. (Hwy 59).

Fanning Excavating had the low quote for this repair replacement work with the cost being consistent with other work this summer. Staff is requesting permission to have Fanning Excavating do this water valve work. Fanning Excavating has worked on other water projects anticipates completing before winter. The current valve leaks and occasionally comes to the surface which could cause ice on the street surface in addition to not working properly.

Recommendation

Approval of the quote with Fanning Excavating Inc. for valve replacement in the amount of \$17,482.30.
